The future of kitchen storage

In one of the most space pressured places in the home, you can instantly create more with SPACE TOWER from Blum – an innovation with flexibility at its very heart. Clever storage solutions provide ample capacity for groceries, which are always to hand thanks to easy access points throughout the unit. It's also a solution that fits around your individual needs and your individual kitchen, with a flexible design that can be tailored to optimise the area you have available.

For flexible access

Your larder unit is going to see a lot of use; that's why it's important that it is easy and convenient to get your hands on what you need when you need it. Every pull out drawer in SPACE TOWER can be opened individually, meaning your items can be stored in an organized way and accessed easily.

Access from three sides

As each drawer extends out fully and safely, even the items in the very back corner of the unit can be accessed easily from the left, right and front.

Come out on top

Every item is fully visible from above when open, so there's no more rummaging to find what you need. Just see it and grab it.

Simple operation

Only open the areas that contain items you need and do so with a light touch, thanks to Blum's innovative easy open technology.

For flexible storage

SPACE TOWER's main priority is providing you with ample storage space – and you'll be surprised just how much you get. The secret is cleverly making the most out of every area and arranging your items in a way that makes them easily available.

 **blum**[®]

High, closed drawer boxes

Your items are stored securely thanks to the high sides on the drawers ensuring nothing falls out, yet the transparent sides make it easy to locate what you need.

Flexible organization

Inner dividing systems allow you to arrange your space the way it suits you, plus help to prevent items such as flour, sugar and rice from falling over.

High load capacity

The superior strength of Blum components mean that even heavy items are stored securely. With a total capacity of up to 350kg, SPACE TOWER maintains stability.

For flexible design

Make the most of every single millimetre of the kitchen with SPACE TOWER. It is available in various height, width and depth options to suit your individual storage space requirements and is flexible enough to fit in aesthetically and functionally with the rest of your kitchen.

 **blum**[®]

Wide versions

If you have more space available, or have more groceries to pack away, the wider SPACE TOWER option is perfect for your needs.

Narrow version

SPACE TOWER is the ideal solution for smaller kitchens, as a large number of provisions can be stored, even with a small cabinet width.

Ease of use

Precision Blum engineering means that drawers glide open smoothly with minimum effort, while BLUMOTION ensures silent and soft closing, every time.

With all box & runner systems

As a result of Blum's relentless research into how people interact with their environment, SPACE TOWER makes everyday kitchen use easier and helps people declutter. It's a system that's compatible with a wide range of Blum components to ensure consistent kitchen design and being so flexible, it can even be used in other living areas. SPACE TOWER also has peace of mind built in, thanks to the Blum lifetime guarantee.
